

Summary | Week 3

Scrum Master for next week?

- Darrington Henderson

List at least 5 things you did well and will continue doing?

1. Communicating with the product owner and my mentor
2. Collaborating with other students
3. Working towards finishing tasks on time
4. Data Wrangling
5. Planning

List at least 3 things you did poorly and how you will mitigate them next sprint?

1. Not meeting as often. Daily meetings weren't completed as often as previous weeks
2. Fully finishing my Data Wrangling tasks
3. Solving for Analysis (Canonical Correlation)

List shout-outs to anyone for excelling in any way?

- I'd like to shout out myself. For stepping up this week and completing tasks and being proactive

What did you learn this week?

- What I learned this week is how to set up my Github for Data Wrangling tasks and Data Analysis.

What did you learn as an individual this week?

- What I learned as an individual this week is that if I'm not constantly working on my tasks daily I can really fall off track fast. This week I had personal tasks I needed to take care of and ended up not completing tasks for almost 3 days. Which really messed up my workload. Setting me back. Now on Sunday, I'm working to get all caught up.
